Arbaz - Incron - La Comba - Arbaz

Arbaz - Incron - Arbaz

Caractéristiques

Longueur	9.57 km
Mont. / Desc.	792 m / 793 m
Alt. min. / max.	1'271 m / 1'921 m
Temps à pied ↕	3 h 48 min

Start

After the village of Arbaz, the road follows a hairpin, 200 meters after this pin turn left following the road to Pierre Grosse. (direction tennis and waste). After passing the dump the road (unpaved) follows a pin. Do not turn, go straight and park your vehicle. Follow the direction Les Evouettes and fork Vermenala, Incron. The climb is quite steep until the Alp of Incron. When you arrive in the first clearing of the pasture do not follow the signs for La Comba, etc. Follow the direction of the «panorama» sign and climb to admire the spectacular foothills of Prabé. Do not go down again, take a path that goes behind the last chalet and goes to point 1817, where the panoramic spectacle starts. This path that you take joins a forest road that you follow uphill. Once arrived at point 1817, the place is ideal for a picnic. Then follow the road downhill to Deylon. Attention, first you follow a road downhill and thereafter, a path that starts flat and begins upstream of the road in a pin. (there is no indication, point 1735). At Deylon, do not get off, follow the uphill path towards point 1953 (there is no indication). Before reaching the bifurcation point 1953, the route is not very obvious because it is an alp and there are many traces of farm animals. The descent path on the Comba is quite easy to find. Once in La Comba, follow Les Evouettes and thereafter, the general direction you have taken for the climb.
