## Passerelle Naters

## Departure

Cross the Naters cemetery and follow the Stations of the Cross uphill. After a short climb continue in a westerly direction. Follow the route for 2 km and after altitude point 879 take a path that climbs towards the main Naters - Mund road. During this climb, there are many false paths that follow a complex irrigation system. Follow the route with the most traffic. Once on the main road, follow it downhill for 400 meters to altitude point 970 and take a path to the right towards Naters to reach the starting point.

## Practical information

To make the loop and join the main Naters-Mund road, you have to be careful not to go astray and follow the right path. At the beginning, the route follows a historical path of the old forts of the war of 39-45.
